### Product Description

**TPS 32** is an extreme-pressure additive for lubricants.

**TPS 32** is an additive for straight and soluble cutting oils used with non copper alloys. Its tertiary dodecyl chain being extremely stable, **TPS 32** is the most efficient dialkyl pentasulfide.

**TPS 32** has a high active sulphur content and corrodes copper. This corrosion is easily inhibited, but for lubricants used with copper alloys we recommend **TPS 20**.

**TPS 32** is totally soluble in most hydrocarbonated solvents such as benzene, toluene, white spirit, fuels. It is fully compatible with mineral and vegetable oils. It is slightly soluble in light alcohols and is not soluble in water.
